SIGNS AND SYMPTOMS OF OVEREXPOSURE
EYES: Serious eye irritation.
SKIN: Contact causes skin irritation.
SKIN ABSORPTION: NA = Not Applicable
INHALATION: May cause headaches and dizziness.

5. FIRE FIGHTING MEASURES

FLAMMABLE CLASS: 3
EXPLOSION HAZARDS: May form flammable/explosive vapor-air mixture.
FIRE FIGHTING PROCEDURES: Use foam. Dry powder. Carbon Dioxide (CO2). Water spray. Sand
FIRE FIGHTING EQUIPMENT: Firefighters should be equipped with self-contained breathing apparatus to protect against potentially toxic and irritating fumes. Use cold water spray to cool fire exposed containers to minimize risk of rupture,
FIRE EXPLOSION: Flammable liquid. Vapors may spread long distances and ignite. Vapors and fumes may form explosive mixture with air.

6. ACCIDENTAL RELEASE MEASURES

SMALL SPILL: Avoid runoff into storm sewers and ditches which lead to waterways.

LARGE SPILL: This material is a water pollutant and should be prevented from contaminating soil or from entering sewage and drainage systems and bodies of water.

GENERAL PROCEDURES: Clean up spills immediately, observing precautions in Protective Equipment section.

SPECIAL PROTECTIVE EQUIPMENT: Wear a self-contained breathing apparatus and appropriate personal protective equipment. (See Exposure Controls/Personal Protection Section).

7. HANDLING AND STORAGE

GENERAL PROCEDURES: Store in a tightly closed container. Use spark proof tools and explosion proof equipment.

HANDLING: Follow all MSDS/label precautions even after container is emptied because it may retain product residues.

STORAGE: Store in a cool dry place.

STORAGE TEMPERATURE: Store in a cool place below ( 68 ) F (20) C

SHELF LIFE: 6 months at ( 65 ) F

COMMENTS: Follow all MSDS/label precautions even after container is emptied because it may retain product residues.

ENGINEERING CONTROLS: Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits.

PERSONAL PROTECTIVE EQUIPMENT

EYES AND FACE: Use chemical splash goggles and face shield (ANSI Z87.1 or approved equivalent).

SKIN: Wear protective gloves

RESPIRATORY: Use process enclosures, local exhaust ventilation, or other engineering controls to control airborne levels below recommended exposure limits. NIOSH/MSHA approved air purifying respirator with an organic vapor cartridge or canister may be permissible under certain circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by air purifying respirators is limited. Use a positive pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air purifying respirators may not provide adequate protection.

PROTECTIVE CLOTHING: Wear suitable protective clothing
